INDEX TO SUBJECTS

A

Acetylcholine receptors, squid nerve fiber Schwann cell membrane, autoradiographic EM, 371

Acetylcholinesterase, low ionic strength aggregates, *Electrophorus* electric organ, biochemistry and EM, 315

Acrosomal reaction, echinoderm sperm, role of Ca^{++} and H^+ in actin assembly and membrane fusion, light and freeze-fracture EM, 536

Actin assembly, actomere initiation of, *Thyone* sperm, EM, 551

– assembly, membrane fusion, acrosomal reaction of echinoderm sperm, role of Ca^{++} and H^+, light and freeze-fracture EM, 536

–, frog oocyte, in vitro polymerization and gelation, biochemistry and EM, 427

–, frog oocyte, intracellular distribution and polymerizability, biochemistry, 439

– localization, *Dictyostelium discoideum*, immunofluorescence and scanning EM, 714

– polymerization, nucleus and cytoplasm, *Amoeba proteus*, biochemistry, 698

–, rabbit or chick muscle, filament destruction by osmium tetroxide, biochemistry and EM, 837

Actomere initiation of actin assembly, *Thyone* sperm, EM, 551

Adhesion, intercellular, fibroblasts, effect of *H-2* gene complex, biochemistry and cytology and immunofluorescence, 377

Adrenal steroidogenesis from high density lipoproteins, stimulation by cytochalasin, biochemistry, 507

Aggregation, bovine heart mitochondria inner membrane, magnesium-induced, reversal by carboxyatractyloside and bongkrekic acid, biochemistry, 417

Alga *Chlamydomonas reinhardtii*, gametic cell fusion, glycopolypeptide synthesis, autoradiography and biochemistry and EM, 165

– *Glaucocystis nostochinearum*, cell wall structure and deposition, light and freeze-fracture EM, 103

Albumin, conversion of proalbumin to, in vivo effect of colchicine on rat hepatic protein synthesis, biochemistry and EM, 400

D-Amino acid oxidase, cell surface of human polymorphonuclear leukocytes, cytochemical EM, 59

Amoeba proteus, nucleus and cytoplasm, actin polymerization, biochemistry, 698

AMP, cyclic, and microtubules, human leukocytes, effect of colchicine on capping, biochemistry and fluorescence microscopy, 881

Anaphase, two-stage, mitosis in *Barbulanympha*, light microscopy, 655

Antibody, double staining of myosin and tubulin, human tissue culture cells, immunochemistry and fluorescence microscopy, 182

Antigen synthesis, SV40 tumor, correlation with late viral gene expression, permissive and nonpermissive cells, cytofluorometry and immunofluorescence, R1

ATPase, myosin, secretory tissues, biochemistry and immunology, 827

–, NaK-, rabbit polymorphonuclear leukocyte membrane, activation by chemotactic factor, biochemistry, 329

Axon transport of tetanus toxin, rat iris, biochemistry and EM, 1

Azolla pinnata, root tips, cortical microtubules, EM, 14

B

Bacteria *Halobacterium halobium*, purple membrane, oriented adsorption to cationic surfaces, biochemistry and freeze-fracture EM, 611

Barbulanympha ufalula, mitosis, spindle structure, formation and kinetochore engagement, light and EM, 638

– *ufalula*, mitosis, two-stage anaphase, nuclear morphogenesis, and cytokinesis, light microscopy, 655

Birefringence, *Barbulanympha* mitosis, spindle structure, formation and kinetochore engagement, light and EM, 638

–, *Barbulanympha* mitosis, two-stage anaphase, nuclear morphogenesis, and cytokinesis, light microscopy, 655

Bladder, urinary, mammalian, translocation of lumenal membrane between cytoplasm and cell surface, transitional epithelial cells, stereological EM, 685

–, urinary, toad, mucosal surface, natriferic and hydroosmotic response to vasopressin, scanning EM, 598

Bongkrekic acid, reversal of magnesium-induced inner membrane aggregation, bovine heart mitochondria, biochemistry, 417

Brain, bovine, protein-free tubulin, effect of pH on assembly of, EM, 120

–, rat, microtubule-associated protein, high molecular weight, location in mitotic spindle, indirect immunofluorescence, R9

C

Calcium binding protein, chick chorioallantoic membrane, immunohistochemistry, 743

– binding protein, chick chorioallantoic membrane, role of vitamin K, biochemistry and immunohistochemistry, 752

– binding proteins, vorticellid spasmoneme, biochemistry, 358

–, role in actin assembly and membrane fusion, echinoderm sperm acrosomal reaction, light and freeze-

fracture EM, 536
Calf, thymus, thymocytes, plasma and nuclear membranes, biochemical composition, 232
–, thymus, thymocytes, plasma and nuclear membranes, enzymatic composition and ultrastructure of, biochemistry and freeze-etch EM, 211
Capping, effect of colchicine, human leukocyte microtubules and cyclic AMP, biochemistry and fluorescence microscopy, 881
– and phagocytosis, human leukocytes, analogous ultrastructure and surface properties, immunofluorescence and EM, 789
Carboxyatractyloside, reversal of magnesium-induced inner membrane aggregation, bovine heart mitochondria, biochemistry, 417
Carchesium polypinum, spasmoneme, calcium-binding proteins, biochemistry, 358
Cardiolipin, rat liver mitochondria, effect of thyroid hormone, biochemistry and light and EM stereology, 887
Catfish *Ictalurus punctatus*, pancreatic islets, myosin isolation, biochemistry and immunology, 827
Cation, induction of attachment of ciliary dynein cross-bridges, EM, R19
Cationic surfaces, oriented adsorption of purple membrane to, *Halobacterium halobium*, biochemistry and freeze-fracture EM, 611
Cell cycle, mutant L cells, temperature-sensitive DNA replication, interphase nuclei and chromatin organization, autoradiography and flow microfluorimetry and light and EM, 246
– differentiation, glycopolypeptide synthesis induced by gametic cell fusion, *Chlamydomonas reinhardtii*, autoradiography and biochemistry and EM, 165
– division, genetic perspective, review article, 627
– surface, human polymorphonuclear leukocytes, D-amino acid oxidase, cytochemical EM, 59
– wall structure and deposition, *Glaucocystis*, light and freeze-fracture EM, 103
Cells, anterior pituitary, recovery of surface membrane, detection with anionic and cationic ferritin, EM, R35
–, chick embryo muscle, effect of membrane lipids on myoblast fusion, biochemistry and cytology, 334
–, chick spinal cord neurons, motoneuron enrichment, biochemistry and cytology, 83
–, Chinese hamster V-79, small replication units, autoradiography and biochemistry and EM, 762
–, epithelial, polarized monolayers formed on permeable and translucent support, biochemistry and freeze-fracture and scanning EM, 853
–, follicular dendritic, mouse spleen germinal centers, cytochemical light and EM, 148
–, HeLa S3, characterization of plasma membrane ghosts, biochemistry and light and EM, 448
–, human HeLa, WI-38, Enson, and rat kangaroo PtK-2, simultaneous localization of myosin and tubulin, immunochemistry and fluorescence microscopy, 182
–, human umbilical vein endothelial, response to fibroblast growth factor, epidermal growth factor, and thrombin, biochemistry and fluorescence and EM, 774
–, intestinal epithelial, plasmalemmal glycoprotein synthesis, Golgi membrane separation from villus and crypt cell surface membranes, glycosyltransferase activity, biochemistry and immunology and EM, 722
Cells, mouse fibroblasts, 3T3 and BHK lines, effect of *H-2* gene complex on intercellular adhesion, biochemistry and cytology and immunofluorescence, 377
–, mouse L mutants, temperature-sensitive DNA replication, interphase nuclei and chromatin organization, autoradiography and flow microfluorimetry and light and EM, 246
–, permissive and nonpermissive, SV40 tumor antigen synthesis and late viral gene expression, cytofluorometry and immunofluorescence, R1
–, photoreceptor, frog, opsin localization in outer segments and Golgi zones, immunocytochemical EM, 196
–, PtK_2, microtubules, immunofluorescence and EM, R27
–, rat kangaroo kidney PtK2 line, plasma membrane inner surface, paracrystalline arrays of membrane-to-membrane cross-bridges, EM, 323
–, Y-1 mouse adrenal tumor, cytochalasin-stimulated steroidogenesis from high density lipoproteins, biochemistry, 507
Cellulose deposition, cell wall, *Glaucocystis*, light and EM, 103
Cerebral cortex, dendrites, rat, potassium-stimulated *p*-nitrophenylphosphatase, EM, R13
Chemotactic factor, activation of NaK-ATPase, rabbit polymorphonuclear leukocyte membrane, biochemistry, 329
Chemotaxis, polymorphonuclear leukocytes, review article, 269
Chick, chorioallantoic membrane, calcium-binding protein, immunohistochemistry, 743
–, chorioallantoic membrane, calcium-binding protein, role of vitamin K, biochemistry and immunohistochemistry, 752
–, muscle actin, filament destruction by osmium tetroxide, biochemistry and EM, 837
Chlamydomonas reinhardtii, gametic cell fusion, glycopolypeptide synthesis, autoradiography and biochemistry and EM, 165
Choline acetyltransferase, motoneuron enrichment of spinal cord cell cultures, biochemistry and cytology, 83
Chorioallantoic membrane, chick, calcium-binding protein, immunohistochemistry, 743
– membrane, chick, calcium-binding protein, role of vitamin K, biochemistry and immunohistochemistry, 753
Chromatin organization, interphase nuclei, mutant L cells, temperature-sensitive DNA replication, autoradiography and flow microfluorimetry and light and EM, 246
Cilia, mollusc, cation-induced attachment of dynein cross-bridges, EM, R19
Colchicine, effect on capping, human leukocyte microtubules and cyclic AMP, biochemistry and fluorescence microscopy, 881
–, in vivo effect of on rat hepatic protein synthesis, proalbumin conversion to albumin, biochemistry and EM, 400

Colony-stimulating factor, macrophage, mouse yolk sac, biochemistry and cytology, 35
Correction factors for volume and surface density estimates, rat liver membrane stereology and section thickness, 565
Cortex, nuclear, membrane surface of, frog oocytes, scanning EM, 517
–, plant root tips, microtubule arrays, EM, 14
Cow, brain, protein-free tubulin, effect of pH on assembly of, EM, 120
–, heart, mitochondria, magnesium-induced inner membrane aggregation, reversal by carboxyatractyloside and bongkrekic acid, biochemistry, 417
Crayfish *Procambarus* and *Orconectes*, muscle, myofilament packing, EM, 48
Cross-bridges, dynein, cation-induced attachment of, mollusc cilia, EM, R19
–, membrane-to-membrane, paracrystalline arrays, plasma membrane inner surface, PtK_2 cells, EM, 323
Crystalloid, granule, guinea pig eosinophil major basic protein, biochemistry and immuno-EM, 702
Cytochalasin stimulation of steroidogenesis from high density lipoproteins, adrenal tumor cells, biochemistry, 507
Cytokinesis, mitosis in *Barbulanympha*, light microscopy, 655
Cytoplasm, *Amoeba proteus*, actin polymerization, biochemistry, 698
– and cell surface, lumenal membrane translocation between, transitional epithelial cells, mammalian urinary bladder, stereological EM, 685
Cytoskeleton, PtK_2 cells, microtubules, immunofluorescence and EM, R27

D

Dendrites, rat cerebral cortex, potassium-stimulated *p*-nitrophenylphosphatase, EM, R13
Dictyostelium discoideum, actin localization, immunofluorescence and scanning EM, 714
DNA polymerase activity, muscle culture, biochemistry, 99
– replication, temperature-sensitive, mutant L cells, interphase nuclei and chromatin organization, autoradiography and flow microfluorimetry and light and EM, 246
– replication units, Chinese hamster V-79 cells, autoradiography and biochemistry and EM, 762
Dynein cross-bridges, cation-induced attachment of, mollusc cilia, EM, R19

E

Electric eel *Electrophorus*, electric organ, acetylcholinesterase, low ionic strength aggregates, biochemistry and EM, 315
– organ, *Electrophorus*, acetylcholinesterase, low ionic strength aggregates, biochemistry and EM, 315
Electron microscopy and immunofluorescence, microtubules in same PtK_2 cell, R27
– microscopy, osmium tetroxide destruction of actin filaments, 837
Electrophorus, electric organ, acetylcholinesterase, low ionic strength aggregates, biochemistry and EM, 315
Envelope, nuclear, membrane surface of, frog oocytes, scanning EM, 517
Enzyme, acetylcholinesterase, low ionic strength aggregates, *Electrophorus* electric organ, biochemistry and EM, 315
–, D-amino acid oxidase, cell surface of human polymorphonuclear leukocytes, cytochemical EM, 59
–, DNA polymerase, muscle cultures, biochemistry, 99
–, glycosyltransferase, Golgi membranes, plasmalemmal glycoprotein synthesis, intestinal epithelial cells, biochemistry and immunology and EM, 722
–, NaK-ATPase, rabbit polymorphonuclear leukocyte membrane, activation by chemotactic factor, biochemistry, 329
–, *p*-nitrophenylphosphatase, potassium-stimulated, rat cerebral cortex dendrites, EM, R13
Enzymes, cytochrome oxidase, glucose-6-phosphatase, monoamino oxidase, and 5′-nucleotidase, membrane recoveries in rat liver subcellular fractions, biochemistry and stereological light and EM, 565
–, plasma and nuclear membranes, calf thymocytes, biochemistry and freeze-etch EM, 211
Eosinophil, guinea pig, localization of major basic protein in granule core, biochemistry and immuno-EM, 702
Epidermal and fibroblast growth factors, and thrombin, response of human vascular endothelial cells, biochemistry and fluorescence and EM, 774
Epithelium, polarized monolayers formed on permeable and translucent support, biochemistry and freeze-fracture and scanning EM, 853
Erythrocyte invasion, *Plasmodium knowlesi* merozoites, EM, 72
Euglena gracilis, flagella, surface organization and composition of mastigonemes, biochemistry and EM, 805
Eye, rat, binding, uptake, and transport of tetanus toxin by iris nerve terminals, biochemistry and EM, 1

F

Factor, chemotactic, activation of NaK-ATPase, rabbit polymorphonuclear leukocyte membrane, biochemistry, 329
–, colony-stimulating, macrophage, mouse yolk sac, biochemistry and cytology, 35
Factors, growth, fibroblast and epidermal, and thrombin, response of human vascular endothelial cells, biochemistry and fluorescence and EM, 774
Ferritin, anionic and cationic, tracer of surface membrane, anterior pituitary cells, EM, R35
Fibroblast and epidermal growth factors, and thrombin, response of human vascular endothelial cells, biochemistry and fluorescence and EM, 774
Filaments, actin, actomere initiation of assembly of, *Thyone* sperm, EM, 551
–, muscle actin, destruction by osmium tetroxide, biochemistry and EM, 837
Flagella, *Euglena*, surface organization and composition of mastigonemes, biochemistry and EM, 805
Fluorescein, tubulin localization, human tissue culture cells, immunochemistry and fluorescence microscopy, 182
Follicular dendritic cells, mouse spleen germinal centers,

cytochemical light and EM, 148
Frog, photoreceptor cells, opsin localization in outer segments and Golgi zones, immunocytochemical EM, 196
– *Xenopus laevis*, oocytes, in vitro polymerization and gelation of actin, biochemistry and EM, 427
– *Xenopus laevis*, oocytes, intracellular distribution and polymerizability of actin, biochemistry, 439
– *Xenopus laevis*, oocytes, membrane surfaces of nuclear envelope and cortex, scanning EM, 517
Fusion, myoblast, effect of lipid alterations, biochemistry and cytology, 334

G

Gametic cell fusion, induction of glycopolypeptide synthesis, *Chlamydomonas reinhardtii*, autoradiography and biochemistry and EM, 165
Gelation and polymerization, frog oocyte actin, biochemistry and EM, 427
– complex, *H-2*, effect on fibroblast intercellular adhesion, biochemistry and cytology and immunofluorescence, 337
– expression, late viral, correlation with antigen synthesis, permissive and nonpermissive cells, cytofluorometry and immunofluorescence, R1
– product expression, cell division, review article, 627
Genetics, cell division, review article, 627
Germinal centers, mouse spleen, follicular dendritic cells, cytochemical light and EM, 148
Ghosts, HeLa S3, characterization of plasma membrane, biochemistry and light and EM, 448
Glaucocystis nostochinearum, cell wall structure and deposition, light and freeze-fracture EM, 103
Glycopolypeptide synthesis induced by gametic cell fusion, *Chlamydomonas reinhardtii*, autoradiography and biochemistry and EM, 165
Glycoproteins, calf thymocyte plasma and nuclear membranes, biochemical composition, 232
–, HeLa S3 plasma membrane ghosts, biochemistry and light and EM, 448
–, mastigoneme, *Euglena* flagella, biochemistry and EM, 805
–, plasmalemmal, synthesis in intestinal epithelial cells, Golgi membrane separation from villus and crypt cell surface membranes, glycosyltransferase activity, biochemistry and immunology and EM, 722
Glycosyltransferase activity, Golgi membranes, plasmalemmal glycoprotein synthesis, intestinal epithelial cells, biochemistry and immunology and EM, 722
Golgi membranes, separation from intestinal villus and crypt cell surface membranes, plasmalemmal glycoprotein synthesis, biochemistry and immunology and EM, 722
– zones and outer segments, frog photoreceptor cells, opsin localization, immunocytochemical EM, 196
Granule core, guinea pig eosinophils, localization of major basic protein in, biochemistry and immuno-EM, 702
Granules, dense storage, isolation from human platelets, biochemistry and EM, 389
–, zymogen, guinea pig pancreas, sulfated macromolecules, biochemistry and light and EM autoradiography, 288
Growth factors, fibroblast and epidermal, and thrombin, response of human vascular endothelial cells, biochemistry and fluorescence and EM, 774
Guinea pig, eosinophil granule core, localization of major basic protein, biochemistry and immuno-EM, 702
– pig, pancreas, zymogen granules, sulfated compounds, biochemistry and light and EM autoradiography, 288

H

H-2 gene complex, effect on fibroblast intercellular adhesion, biochemistry and cytology and immunofluorescence, 377
Halobacterium halobium, purple membrane, oriented adsorption to cationic surfaces, biochemistry and freeze-fracture EM, 611
Heart, bovine, mitochondria, magnesium-induced inner membrane aggregation, reversal by carboxyatractyloside and bongkrekic acid, biochemistry, 417
Hog, salivary and pituitary glands, myosin isolation, biochemistry and immunology, 807
Hormone, thyroid, effect on rat liver mitochondria, biochemistry and light and EM stereology, 887
Human leukocytes, analogous ultrastructure and surface properties during capping and phagocytosis, immunofluorescence and EM, 789
–, leukocytes, microtubules and cyclic AMP, effect of colchicine on capping, biochemistry and fluorescence microscopy, 881
–, platelets, isolation of dense storage granules, biochemistry and EM, 389
–, polymorphonuclear leukocytes, D-amino acid oxidase on cell surface, cytochemical EM, 59
Hydrogen, role in actin assembly and membrane fusion, echinoderm sperm acrosomal reaction, light and freeze-fracture EM, 536
Hydro-osmotic response to vasopressin, toad urinary bladder mucosal surface, scanning EM, 598

I

Ictalurus punctatus, pancreatic islets, myosin isolation, biochemistry and immunology, 827
Immunofluorescence and EM, microtubules in same PtK2 cell, R27
Impatiens balsamina, root tips, cortical microtubules, EM, 14
Intestine, rat, epithelial cells, plasmalemmal glycoprotein synthesis, Golgi membrane separation from villus and crypt cell surface membranes, glycosyltransferase activity, biochemistry and immunology and EM, 722
Ions, calcium, potassium, and sodium, role in chemotaxis, polymorphonuclear leukocytes, review article, 269

J

Junction, moving, erythrocyte invasion by malarial merozoites, EM, 72

K

Kinetochore engagement, mitosis in *Barbulanympha*, light and EM. 638

L

Leukocytes, human, analogous ultrastructure and surface properties during capping and phagocytosis, immunofluorescence and EM. 789
–, human, microtubules and cyclic AMP, effect of colchicine on capping, biochemistry and fluorescence microscopy. 881
–, polymorphonuclear, chemotaxis by, review article. 269
–, polymorphonuclear, human, D-amino acid oxidase on cell surface, cytochemical EM. 59
–, polymorphonuclear, rabbit, activation of membrane NaK-ATPase by chemotactic factor, biochemistry. 329
Lipids, membrane, effect of alteration of on myoblast fusion, biochemistry and cytology. 334
Lipoproteins, high density, steroidogenesis from, adrenal tumor cells, stimulation by cytochalasin, biochemistry. 507
–, very low density, role of rat liver microtubules in hepatic secretion of, biochemistry and light and EM. 735
Liver, rat, in vivo effect of colchicine on protein synthesis, proalbumin conversion to albumin, biochemistry and EM. 400
–, rat, membrane recoveries in subcellular fractions, biochemistry and stereological light and EM. 565
–, rat, membrane stereology and section thickness, correction factors for volume and surface density estimates. 584
–, rat, mitochondria, effect of thyroid hormone, biochemistry and light and EM stereology. 887
–, rat, mitochondria, in vitro structural changes, spray-freeze-etching EM. 134
–, rat, role of microtubules in hepatic lipoprotein secretion, biochemistry and light and EM. 735
–, rat, rough microsomes, membrane proteins, cross-linking to bound ribosomes, biochemistry. 488
–, rat, rough microsomes, membrane proteins ribophorins I and II, biochemistry and EM. 464
Locomotion and chemotaxis, polymorphonuclear leukocytes, review article. 269

M

Macromolecules, sulfated, guinea pig pancreatic zymogen granules, biochemistry and light and EM autoradiography. 288
Macrophage colony-stimulating factor, mouse yolk sac, biochemistry and cytology. 35
Macrophages, mouse spleen, germinal centers, follicular dendritic cells, cytochemical light and EM. 148
Magnesium, induction of attachment of ciliary dynein cross-bridges, EM. R19
–, induction of inner membrane aggregation, bovine heart mitochondria, reversal by carboxyatractyloside and bongkrekic acid, biochemistry. 417
Malaria, *Plasmodium knowlesi*, merozoites, erythrocyte invasion, EM. 72
Mammals, urinary bladder, translocation of lumenal membrane between cytoplasm and cell surface, transitional epithelial cells, stereological EM. 685
Marthasterias gracilis, sperm, actin assembly and membrane fusion in acrosomal reaction, role of Ca^{++} and H^+, light and freeze-fracture EM. 536
Mastigoneme, organization and composition of, *Euglena* flagella, biochemistry and EM. 805
Membrane, chorioallantoic, chick, calcium-binding protein, immunohistochemistry. 743
–, chorioallantoic, chick, calcium-binding protein, role of vitamin K, biochemistry and immunohistochemistry. 752
– fusion, actin assembly, acrosomal reaction of echinoderm sperm, role of Ca^{++} and H^+, light and freeze-fracture EM. 536
–, Golgi, separation from intestinal villus and crypt cell surface membranes, plasmalemmal glycoprotein synthesis, biochemistry and immunology and EM. 722
–, inner, bovine heart mitochondria, magnesium-induced aggregation, reversal by carboxyatractyloside and bongkrekic acid, biochemistry. 417
– lipids, effect of alteration of on myoblast fusion, biochemistry and cytology. 334
–, lumenal, translocation between cytoplasm and cell surface, transitional epithelial cells, mammalian urinary bladder, stereological EM. 685
–, plasma, HeLa ghosts, characterization of, biochemistry and light and EM. 448
–, plasma, inner surface, PtK_2 cells, paracrystalline arrays of membrane-to-membrane cross-bridges, EM. 323
– proteins, rat liver rough microsomes, cross-linking to bound ribosomes, biochemistry. 488
– proteins ribophorins I and II, rat liver rough microsomes, biochemistry and EM. 464
–, purple, *Halobacterium halobium*, oriented adsorption to cationic surfaces, biochemistry and freeze-fracture EM. 611
–, rabbit polymorphonuclear leukocytes, activation of NaK-ATPase by chemotactic factor, biochemistry. 329
– recoveries in rat liver subcellular fractions, biochemistry and stereological light and EM. 565
– stereology and section thickness, rat liver, correction factors for volume and surface density estimates. 584
–, surface, recovery of, anterior pituitary cells, detection with anionic and cationic ferritin, EM. R35
– surfaces, nuclear envelope and cortex, frog oocytes, scanning EM. 517
Membranes, plasma and nuclear, calf thymocytes, biochemical composition. 232
–, plasma and nuclear, calf thymocytes, enzymatic composition and ultrastructure of, biochemistry and freeze-etch EM. 211
Merozoites, *Plasmodium knowlesi*, erythrocyte invasion, EM. 72
Microfibrils, cell wall, *Glaucocystis*, light and EM. 103
Microsomes, rough, rat liver, membrane proteins, cross-linking to bound ribosomes, biochemistry. 488
–, rough, rat liver, membrane proteins ribophorins I and II, biochemistry and EM. 464

Microtubule-associated protein, high molecular weight, rat brain, location in mitotic spindle, indirect immunofluorescence, R9
Microtubules, cone myoid elongation, teleost retina, EM, 881
–, cortical, plant root tips, EM, 14
– and cyclic AMP, human leukocytes, effect of colchicine on capping, biochemistry and fluorescence microscopy, 735
–, PtK2 cells, immunofluorescence and EM, R27
–, rat liver, role in hepatic lipoprotein secretion, biochemistry and light and EM, 735
Mitochondria, bovine heart, magnesium-induced inner membrane aggregation, reversal by carboxyatractyloside and bongkrekic acid, biochemistry, 417
–, rat liver, effect of thyroid hormone, biochemistry and light and EM stereology, 887
–, rat liver, in vitro structural changes, spray-freeze-etching EM, 134
Mitosis, *Barbulanympha*, spindle structure, formation and kinetochore engagement, light and EM, 638
–, *Barbulanympha*, two-stage anaphase, nuclear morphogenesis, and cytokinesis, light microscopy, 655
Mitotic spindle, high molecular weight microtubule-associated protein, indirect immunofluorescence, R9
Mollusc *Unio*, cilia, catio-induced attachment of dynein cross-bridges, EM, R19
Monkey malaria *Plasmodium knowlesi*, merozoites, erythrocyte invasion, EM, 72
Monolayers, polarized, epithelial cells, formed on permeable and translucent support, biochemistry and freeze-fracture and scanning EM, 853
Motility, *Dictyostelium discoideum*, actin localization, immunofluorescence and scanning EM, 714
Motoneuron enrichment of spinal cord cell cultures, biochemistry and cytology, 83
Mouse, spleen, germinal centers, follicular dendritic cells, cytochemical light and EM, 148
–, yolk sac, macrophage colony-stimulating factor, biochemistry and cytology, 35
Mucosa, toad urinary bladder, natriferic and hydro-osmotic response to vasopressin, scanning EM, 598
Muscle, crayfish, myofilament packing, EM, 48
Mutants, cell cycle, genetic perspective, review article, 627
Myoblast fusion, effect of lipid alterations, biochemistry and cytology, 334
Myoblasts, DNA polymerase activity, biochemistry, 99
Myofilament packing, crayfish muscle, EM, 48
Myosin, isolation from secretory tissues, biochemistry and immunology, 827
– and tubulin, simultaneous localization of, human tissue culture cells, immunochemistry and fluorescence microscopy, 182

N

Natriferic response to vasopressin, toad urinary bladder mucosal surface, scanning EM, 598
Nerve fiber, giant, squid, Schwann cell membrane acetylcholine receptors, autoradiographic EM, 371
– terminals, rat iris, binding, uptake and transport of tetanus toxin, biochemistry and EM, 1
p-Nitrophenylphosphatase, potassium-stimulated, rat cerebral cortex dendrites, EM, R13
Nuclear morphogenesis, mitosis in *Barbulanympha*, light microscopy, 655
Nucleus, *Amoeba proteus*, actin polymerization, biochemistry, 698
–, frog oocytes, membrane surfaces of envelope and cortex, scanning EM, 517
–, interphase, chromatin organization, mutant L cells, temperature-sensitive DNA replication, autoradiography and flow microfluorimetry and light and EM, 246
Nylon, collagen-coated, formation of polarized monolayers by epithelial cells, biochemistry and freeze-fracture and scanning EM, 853

O

Oocytes, frog, in vitro polymerization and gelation of actin, biochemistry and EM, 427
–, frog, intracellular distribution and polymerizability of actin, biochemistry, 439
–, frog, membrane surfaces of nuclear envelope and cortex, scanning EM, 517
Opsin localization, outer segments and Golgi zones, frog photoreceptor cells, immunocytochemical EM, 196
Orconectes muscle, myofilament packing, EM, 48
Osmium tetroxide, destruction of actin filaments, biochemistry and EM, 837
Outer segments and Golgi zones, frog photoreceptor cells, opsin localization, immunocytochemical EM, 196

P

Pancreas, guinea pig, zymogen granules, sulfated compounds, biochemistry and light and EM autoradiography, 288
–, islets, catfish, myosin isolation, biochemistry and immunology, 827
Paracrystals, membrane-to-membrane cross-bridges, PtK_2 cells, plasma membrane inner surface, EM, 323
Parasite, malaria *Plasmodium knowlesi*, merozoites, erythrocyte invasion, EM, 72
Peptides, role in chemotaxis, polymorphonuclear leukocytes, review article, 269
pH, effect on assembly of bovine brain protein-free tubulin, EM, 120
Phagocytosis and capping, human leukocytes, analogous ultrastructure and surface properties, immunofluorescence and EM, 789
Phosphorylation and structural changes, rat liver mitochondria, spray-freeze-etching EM, 134
Pisaster ochraceus, sperm, actin assembly and membrane fusion in acrosomal reaction, role of Ca^{++} and H^{+}, light and freeze-fracture EM, 536
Pituitary, anterior, recovery of surface membrane, detection with anionic and cationic ferritin, EM, R35
– gland, hog, myosin isolation, biochemistry and immunology, 827
Plants *Azolla pinnata*, *Impatiens balsamina*, and *Zea mays*, root tips, cortical microtubules, EM, 14
Plasmodium knowlesi, merozoites, erythrocyte invasion,

EM. 72
Platelets, human, isolation of dense storage granules, biochemistry and EM. 389
Polarization, epithelial cell monolayers, formation on permeable and translucent support, biochemistry and freeze-fracture and scanning EM. 853
Polymerization, actin, nucleus and cytoplasm, *Amoeba proteus*, biochemistry. 698
– and gelation, frog oocyte actin, biochemistry and EM. 427
– and intracellular distribution, frog oocyte actin, biochemistry. 439
Polypeptide, glyco-, synthesis induced by gametic cell fusion, *Chlamydomonas reinhardtii*, autoradiography and biochemistry and EM. 165
Proalbumin conversion to albumin, in vivo effect of colchicine on rat hepatic protein synthesis, biochemistry and EM. 400
Procambarus muscle, myofilament packing, EM. 48
Protein, calcium-binding, chick chorioallantoic membrane, immunohistochemistry. 743
–, calcium-binding, chick chorioallantoic membrane, role of vitamin K, biochemistry and immunohistochemistry. 752
–, major basic, localization in granule core, guinea pig eosinophils, biochemistry and immuno-EM. 702
–, microtubule-associated, high molecular weight, rat brain, location in mitotic spindle, indirect immunofluorescence. R9
Proteins, calcium-binding, vorticellid spasmoneme, biochemistry. 358
–, membrane, rat liver rough microsomes, cross-linking to bound ribosomes, biochemistry. 488
–, membrane, ribophorins I and II, rat liver rough microsomes, biochemistry and EM. 464
– synthesis, rat liver, in vivo effect of colchicine, proalbumin conversion to albumin, biochemistry and EM. 400
Protofilament structure, effect of pH on assembly of, bovine brain protein-free tubulin, EM. 120
Protozoa *Vorticella convallaria*, *Carchesium polypinum*, and *Zoothamnium geniculatum*, spasmoneme, calcium-binding proteins, biochemistry. 358
Protozoan *Amoeba proteus*, nucleus and cytoplasm, actin polymerization, biochemistry. 698
– *Barbulanympha ufalula*, mitosis, spindle structure, formation and kinetochore engagement, light and EM. 638
– *Barbulanympha ufalula*, mitosis, two-stage anaphase, nuclear morphogenesis, and cytokinesis, light microscopy. 655
– *Euglena gracilis*, flagella, surface organization and composition of mastigonemes, biochemistry and EM. 805
– slime mold *Dictyostelium discoideum*, actin localization, immunofluorescence and scanning EM. 714

R

Rabbit, muscle actin, filament destruction by osmium tetroxide, biochemistry and EM. 837
–, polymorphonuclear leukocytes, activation of membrane NaK-ATPase by chemotactic factor, biochemistry. 329
Radioactive label, [^{198}Au]gold and [^{125}I]tetanus toxin, binding, uptake and transport of tetanus toxin by rat iris-nerve terminals, biochemistry and EM. 1
Radioactive label, [^{14}C]acetate and [^{3}H]arginine, glycopolypeptide synthesis induced by gametic cell fusion, *Chlamydomonas reinhardtii*, autoradiography and biochemistry and EM, 165
– label, [^{14}C]arginine, [^{3}H]glutamic acid, and [^{3}H]leucine, in vivo effect of colchicine on rat hepatic protein synthesis, proalbumin conversion to albumin, biochemistry and EM, 400
– label, [^{14}C]serotonin and [^{3}H]adenine, isolation of dense storage granules, human platelets, biochemistry and EM. 389
– label, [^{14}C]- and [^{3}H]fucose, characterization of HeLa S3 plasma membrane ghosts, biochemistry and light and EM. 448
– label, [^{3}H]acetyl Co-A, motoneuron enrichment of spinal cord cell cultures, biochemistry and cytology. 83
– label, [^{3}H]choline, [^{3}H]puromycin, and [^{125}I]sodium iodide, rat liver rough microsome membrane proteins, cross-linking of bound ribosomes, biochemistry. 488
– label, [^{3}H]glycerol, role of rat liver microtubules in hepatic lipoprotein secretion, biochemistry and light and EM. 735
– label, [^{3}H]leucine, effect of *H-2* gene complex on fibroblast intercellular adhesion, biochemistry and cytology and immunofluorescence. 377
– label, [^{3}H]leucine and [^{35}S]sulfate, sulfated macromolecules, zymogen granules of guinea pig pancreas, biochemistry and light and EM autoradiography. 288
– label, [^{3}H]thymidine, DNA polymerase activity in muscle cultures, biochemistry. 99
– label, [^{3}H]thymidine, visualization of small replication units, mammalian cells, autoradiography and biochemistry and EM. 762
– label, [^{125}I]α-bungarotoxin, acetylcholine receptors, squid nerve fiber Schwann cell membrane, autoradiographic EM. 371
– label, [^{125}I]sodium iodide, response of human umbilical vein endothelial cells to fibroblast growth factor, epidermal growth factor, and thrombin, biochemistry and fluorescence and EM. 774
– label, [^{131}I]sodium iodide, calf thymocyte plasma and nuclear membranes, biochemical composition. 232
– label, [*methyl*-^{3}H]choline, rat liver rough microsomes, membrane proteins ribophorins I and II, biochemistry and EM. 464
– label, [*methyl*-^{3}H]thymidine, temperature-sensitive DNA replication in mutant L cells, interphase nuclei and chromatin organization, autoradiography and flow microfluorimetry and light and EM. 246
– label, [^{32}P]ATP, enzymatic composition and ultrastructure of calf thymocyte plasma and nuclear membranes, biochemistry and freeze-etch EM. 211
Radioimmunoassay, major basic protein, localization in granule core, guinea pig eosinophils, biochemistry and immuno-EM. 702
Rat, brain, microtubule-associated protein, high molecular weight, location in mitotic spindle, indirect immunofluorescence. R9
–, cerebral cortex, dendrites, potassium-stimulated *p*-nitrophenylphosphatase, EM. R13
–, eye, binding, uptake and transport of tetanus toxin

by iris nerve terminals. biochemistry and EM. 1
Rat, intestine, epithelial cells, plasmalemmal glycoprotein synthesis, Golgi membrane separation from villus and crypt cell surface membranes, glycosyltransferase activity, biochemistry and immunology and EM, 722
–, liver. in vivo effect of colchicine on protein synthesis. proalbumin conversion to albumin. biochemistry and EM. 400
–, liver. membrane recoveries in subcellular fractions. biochemistry and stereological light and EM. 565
–, liver. membrane stereology and section thickness. correction factors for volume and surface density estimates. 584
–, liver. mitochondria. effect of thyroid hormone. biochemistry and light and EM stereology. 887
–, liver. mitochondria. in vitro structural changes. spray-freeze-etching EM. 134
–, liver. role of microtubules in hepatic lipoprotein secretion. biochemistry and light and EM. 735
–, liver. rough microsomes. membrane proteins. cross-linking to bound ribosomes. biochemistry. 488
–, liver. rough microsomes. membrane proteins. ribophorins I and II. biochemistry and EM. 464
Receptors. acetylcholine. squid nerve fiber Schwann cell membrane. autoradiographic EM. 371
Replication units. visualization of. Chinese hamster V-79 cells. autoradiography and biochemistry and EM. 762
Retina. frog. opsin localization in outer segments and Golgi zones. immunocytochemical EM. 196
Rhodamine. myosin localization. human tissue culture cells. immunochemistry and fluorescence microscopy. 182
Rhodopsin localization. outer segments and Golgi zones. frog photoreceptor cells. immunocytochemical EM. 196
Ribophorins I and II. membrane proteins. rat liver rough microsomes. biochemistry and EM. 464
Ribosome binding. proteins of rat liver rough microsomal membranes. biochemistry and EM. 464
Ribosomes. bound. cross-linking to rat liver rough microsome membrane proteins. biochemistry. 488
Root tips. plant cells. cortical microtubules. EM. 14

S

Salivary gland. hog. myosin isolation. biochemistry and immunology. 827
Schwann cell membrane. squid nerve fiber. acetylcholine receptors. autoradiographic EM. 371
Sea cucumber *Thyone briareus*. sperm. actin assembly and membrane fusion in acrosomal reaction. role of Ca^{++} and H^+. light and freeze-fracture EM. 536
– cucumber *Thyone briareus*. sperm. actomere initiation of actin assembly. EM. 551
Section thickness and membrane stereology. rat liver. correction factors for volume and surface density estimates. 584
Sepioteuthis sepioidea. giant nerve fiber. Schwann cell membrane acetylcholine receptors. autoradiographic EM. 371
Serotonin granules. isolation from human platelets. biochemistry and EM. 389
Spasmoneme. vorticellid. calcium-binding proteins. biochemistry. 358
Sperm. echinoderm. actin assembly and membrane fusion in acrosomal reaction. role of Ca^{++} and H^+. light and freeze-fracture EM. 536
–. *Thyone briareus*. actomere initiation of actin assembly. EM. 551
Spindle structure. mitosis in *Barbulanympha*. light and EM. 638
Spleen. mouse. germinal centers. follicular dendritic cells. cytochemical light and EM. 148
Squid *Sepioteuthis sepioidea*. giant nerve fiber. Schwann cell membrane acetylcholine receptors. autoradiographic EM. 371
Starfish *Marthasterias gracilis*. sperm. actin assembly and membrane fusion in acrosomal reaction. role of Ca^{++} and H^+. light and freeze-fracture EM. 536
Steroidogenesis from high density lipoproteins. adrenal tumor cells. stimulation by cytochalasin. biochemistry. 507
Storage granules. dense. isolation from human platelets. biochemistry and EM. 389
Subcellular fractions. rat liver. membrane recoveries in. biochemistry and stereological light and EM. 565
Sulfate incorporation. zymogen granule macromolecules. guinea pig pancreas. biochemistry and light and EM autoradiography. 288
Surface. cationic. oriented adsorption of purple membrane to. *Halobacterium halobium*. biochemistry and freeze-fracture EM. 611
–. cell. and cytoplasm. lumenal membrane translocation between. transitional epithelial cells. mammalian urinary bladder. stereological EM. 685
– density estimates. correction factors. rat liver membrane stereology and section thickness. 584
–. inner. plasma membrane. paracrystals of membrane-to-membrane cross-bridges. PtK_2 cells. EM. 323
–. membrane. nuclear envelope and cortex. frog oocytes. scanning EM. 517
– membrane recovery. anterior pituitary cells. detection with anionic and cationic ferritin. EM. R35
– properties and analogous ultrastructure. capping and phagocytosis. human leukocytes. immunofluorescence and EM. 789

T

Temporal order. cell division. genetic perspective. review article. 627
Tetanus toxin. binding. uptake. and transport of by rat iris nerve terminals. biochemistry and EM. 1
Thrombin. and fibroblast and epidermal growth factors. response of human vascular endothelial cells. biochemistry and fluorescence and EM. 774
Thymocytes. calf thymus. plasma and nuclear membranes. biochemical composition. 232
–. calf thymus. plasma and nuclear membranes. enzymatic composition and ultrastructure of. biochemistry and freeze-etch EM. 211
Thymus. calf. thymocytes. plasma and nuclear membranes. biochemical composition. 232
–. calf. thymocytes. plasma and nuclear membranes. enzymatic composition and ultrastructure of. biochemistry and freeze-etch EM. 211
Thyone briareus. sperm. actin assembly and membrane fusion in acrosomal reaction. role of Ca^{++} and H^+. light and freeze-fracture EM. 536
– *briareus*. sperm. actomere initiation of actin assembly.

EM. 551
Thyroid hormone. effect on rat liver mitochondria. biochemistry and light and EM stereology. 887
Tissue culture. chick embryo muscle. DNA polymerase activity. biochemistry. 99
– culture. chick embryo muscle. effect of membrane lipids on myoblast fusion. biochemistry and cytology. 334
– culture. chick spinal cord neurons. motoneuron enrichment. biochemistry and cytology. 83
– culture. human umbilical vein endothelial cells. response to fibroblast growth factor. epidermal growth factor. and thrombin. biochemistry and fluorescence and EM. 774
– culture. mouse bone marrow. macrophage colony-stimulating factor. biochemistry and cytology. 35
Toad. urinary bladder. mucosal surface. natriferic and hydro-osmotic response to vasopressin. scanning EM. 598
Topotaxis. polymorphonuclear leukocytes. review article. 269
Toxin. tetanus. binding. uptake. and transport of by rat iris nerve terminals. biochemistry and EM. 1
Transduction and chemotaxis. polymorphonuclear leukocytes. review article. 269
Tubulin and myosin. simultaneous localization of. human tissue culture cells. immunochemistry and fluorescence microscopy. 182
–. protein-free. bovine brain. effect of pH on assembly of. EM. 120
Tumor. SV40. antigen synthesis. correlation with late viral gene expression. permissive and nonpermissive cells. cytofluorometry and immunofluorescence. R1

U

Unio. cilia. cation-induced attachment of dynein cross-bridges. EM. R19

V

Valinomycin. effect on phosphorylation and structural changes. rat liver mitochondria. spray-freeze-etching EM. 134
Vasopressin. natriferic and hydro-osmotic response to. toad urinary bladder mucosal surface. scanning EM. 598
Vesicles. discoidal. lumenal membrane translocation between cytoplasm and cell surface. transitional epithelial cells. mammalian urinary bladder. stereological EM. 685
Vitamin K. role in calcium-binding protein. chick chorioallantoic membrane. biochemistry and immunohistochemistry. 752
Vorticella convallaria. spasmoneme. calcium-binding proteins. biochemistry. 358

X

Xenopus laevis. oocytes. in vitro polymerization and gelation of actin. biochemistry and EM. 427
– *laevis*. oocytes. intracellular distribution and polymerizability of actin. biochemistry. 439
– *laevis*. oocytes. membrane surfaces of nuclear envelope and cortex. scanning EM. 517

Y

Yolk sac. mouse. macrophage colony-stimulating factor. biochemistry and cytology. 35

Z

Zea mays. root tips. cortical microtubules. EM. 14
Zoothamnium geniculatum. spasmoneme. calcium-binding proteins. biochemistry. 358
Zygote. *Chlamydomonas reinhardtii*. glycopolypeptide synthesis. autoradiography and biochemistry and EM. 165
Zymogen granules. guinea pig pancreas. sulfated macromolecules. biochemistry and light and EM autoradiography. 288
